RISK MANAGEMENT

What is it?
Who’s responsible for it?
"Risk management is the **identification**, **assessment**, and **prioritization** of risks, followed by coordinated and economical application of resources to **minimize** and **control** the probability and/or **impact of unfortunate events** or to **maximize** the realization of opportunities," (Hubbard, 2009).
Identification, Assessment & Prioritization
Starts with setting expectations for representing your organization.

Important that leaders demonstrate and uphold organizational values.

Minimize & Control the Impact
Being proactive when issues arise, rather than waiting for others to come to you.

Utilizing current organization policy.

Maximize the Opportunities
Preparing for how you would respond to a member, your whole chapter, FSL@UNI, or nationals if an issue arose.

Capitalizing on sharing the good.
How do you set expectations?

How do you hold your members/your organization to them?

COLLABORATION

How can we work together?
**Collaboration**

**Before**
We’re always here as a resource and a willing collaborator for programming, education, and to help create understanding.

Don’t wait for us to come to you.

**During**
Opportunities exist for cooperation and communication which result in collaboration throughout an investigation.

**After**
Willingness to pursue sanctions that align with local or national sanctions.

Educational opportunities are an opportunity for collaboration.
